Subject: thank you

David, Sam and Ben

I just wanted to send you a quick note to let you know the positive feedback we received from our Safety Inspector. Rich inspects all of our construction projects, from water mains, to pump replacements to tank painting, looking for areas that need improvement or safety issues that he observes which require correction.

After inspecting St Andrews several times, Rich said you have a very good safety program, that the work at the tank is done well, and that your internal safety inspector is active in reviewing your jobs and making necessary corrections before it is an issue. I passed these comments along to our Procurement group as well as other internal Engineering staff.

Thank you for working hard on your safety program and for making the necessary effort to keep your crews safe. It is always a pleasure to work with Alpine and I appreciate your work ethic and the efforts you put in place to make the projects go smoothly

Paula
